

# Backup for Microsoft 365

A feature available with N-able Backup

N-able™ Backup for Microsoft 365™ is designed to help you protect Microsoft 365 users from data loss. Backup for Microsoft 365 helps you retain and restore Exchange™, OneDrive®, and SharePoint® data—and you can do it from the same web-based dashboard you use to protect servers, workstations, and critical business documents.

## Protect Microsoft 365 from the same dashboard as servers and workstations

- Save administrative time every day by checking status and managing backups in one place.
- Improve backup management efficiency with at-a-glance status views and one-click drilldown reports.
- Show backup status across customers and devices and data types with a clean, web-based console.

## Cloud data storage included

- Cloud storage in your choice of 17 worldwide data centers is included in your price\*.

## Retain and recover customer data

- Help customers meet retention and regulatory requirements with data storage in your choice of 17 worldwide data centers.
- Retain and recover Microsoft 365 Exchange email, calendars, contacts, and tasks for seven years.
- Retain and recover Microsoft 365 OneDrive data for one year.
- Retain and recover Microsoft 365 SharePoint data and permissions for one year.

Please note that Backup for Microsoft 365 is currently available only in the standalone and N-central® integrated versions of N-able Backup.

\*Fair use policy includes up to 1TB of Microsoft 365 data per user.

## Recover as needed, independent of microsoft support

- Equip yourself to respond to customer requests without reliance upon Microsoft support responsiveness.
- Back up Microsoft 365 Exchange up to six times a day.
- Back up Microsoft 365 OneDrive up to four times a day.
- Back up Microsoft 365 SharePoint (including Teams files and data stored in SharePoint) up to four times a day. Custom and sub-libraries are backed up and can be recovered individually as needed.

## Extend and modernize your data protection services offering

- Keep your data protection services up-to-date as your customers adopt Microsoft 365.
- Continue to add value as your customers' SaaS application usage evolves.
- Don't lose customers to competitors that offer broader data protection services.
