

ALTARO VM BACKUP for MSPs

Altaro VM Backup for MSPs is a subscription program that allows you to manage and monitor all your customers' virtual machine (VM) backups and replicated VMs from a single, multi-tenant online console.

Multi-tenancy

Manage and monitor all your customers' backups and replicated VMs through a single online console.

Pay per VM

Pay based on usage per VM per month at the most accessible price in the industry.

No contracts

Minimum monthly payment of only 10 VMs per month; you can scale up to 1,000s of VMs.

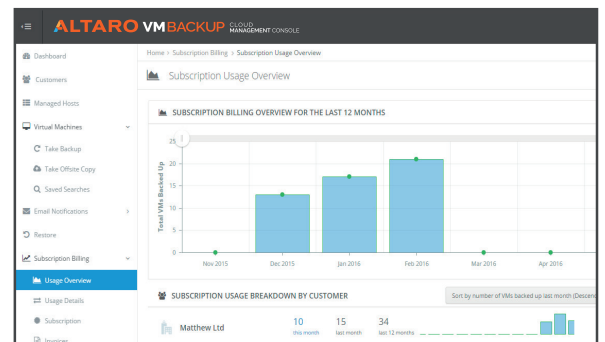

Provide offsite storage

Back up & replicate your customers' VMs to their servers, the cloud or your own servers and bill for storage consumption.

Through the Altaro VM Backup for MSPs subscription program you can roll out the latest and most feature-rich editions of Altaro VM Backup across all your customers with no upfront fees through a monthly subscription. All managed and monitored centrally through a ground-breaking, multi-tenant Cloud Management Console (CMC), making life easy and hassle-free.

Benefits of the Altaro VM Backup for MSPs subscription program.

- **Central multi-tenant management** - Manage and monitor all your customer installations through a single online management console.
- **No upfront costs** - No binding contracts, minimum monthly payment of only 10 VMs per month across all your customers. Scale up to 1,000s of VMs.
- **Pay based on usage** - Pay per VM per month.
- **Data storage** - Centrally manage, monitor and bill for storage consumption per user.
- **Lightning Fast Call Response Guarantee** - 20-second average call pick up.
- **WAN-Optimized Replication** - Enjoy incremental revenue by providing replication services.

The Altaro VM Backup for MSPs subscription program covers the use of both:

Cloud Management Console

Allows you to manage and monitor all your customer virtual backups from anywhere.

Altaro VM Backup

Get all the features of the **Unlimited Plus Edition** across to all your customers.

ALTARO VM BACKUP

CLOUD MANAGEMENT CONSOLE

Monitor, initiate backups, replicate, restore, track billing & much more across all your customers.

Altaro's ground-breaking CMC is a cloud-based management tool for Altaro VM Backup built to allow MSPs to centrally manage and monitor all their customers' VM backups from a single online console, making life easy and hassle-free.

Multi-tenant

Designed to manage multi-customer environments, completely isolated from each other

Real-time status updates & alerts

View live operation activity & backup results as they occur, and set instant email alerts for successful operations, warnings, failed operations and more.

Manage your backups/restores

Start backups, configure replication and backup locations and restore VMs directly from the online portal.

Customer reporting

Report on VM usage by customer for easy billing and invoicing.

ALTARO VM BACKUP

Used by over 40,000 customers worldwide, Altaro VM Backup is a reliable backup solution for Hyper-V and VMware-based virtual machines.

Altaro VM Backup is straightforward to use, while its powerful features make it a reliable solution every MSP would want to have to keep their customers' data safe.

Get a powerful backup and replication solution packed with robust tools and great performance at an unbeatable value. Through the MSP program you will gain access to all features, including the WAN-Optimized Replication functionality, that enables users to be back up and running in minimal time should disaster strike.

- WAN-Optimized Replication
- Augmented Inline Deduplication
- Continuous data protection
- Instant boot from backup
- Offsite backups
- Fast compression rates
- and more
