

Security. Simplicity. Speed.

VIPRE Business Premium is the small-footprint antivirus that defends your network without slowing it down. Protecting more than 10 million endpoints around the world, VIPRE technology defends you from emerging threats like viruses, Trojans, rootkits, exploits, spyware, malicious websites, phishing attacks and more.

VIPRE Business Premium delivers:

- » Powerful antivirus for PCs and Macs
- » Low CPU and memory usage
- » Integrated patch management
- » Mobile Device Management
- » Malicious URL blocking
- » Email security and anti-phishing
- » Firewall protection

Comprehensive Malware Defense

Mission #1 for your endpoint security solution is stopping malware. VIPRE Business Premium accomplishes this through next-generation scanning technology, always-on Active Protection™, heuristics, signatures and other sophisticated detection methods to monitor and protect against emerging malware threats.

VIPRE Business Premium also provides an array of advanced features that offers multiple layers of defense against your top threat vectors.

Integrated Patch Management ensures many of the third-party software applications on your PCs are up-to-date and not vulnerable to exploit kits delivering data-stealing payloads.

Malicious URL Blocking stops users from visiting malicious or compromised websites serving malware.

Anti-Phishing and Email Security keeps users' inboxes safe from malicious attachments and phishing links to prevent infections and loss of sensitive data and login credentials.

Mobile Device Management secures Android devices from mobile malware, and provides the ability to locate, lock and wipe lost Android and iOS devices.

Endpoint Security You Can Trust

VIPRE earns high marks with security experts.

"A lot of additional protection over basic AV, yet [VIPRE] deploys just as easily for around the same cost."

Proven Protection

VIPRE malware defense is certified by these leading testing authorities.

Easy Management Saves You Time

Easy to deploy and manage, VIPRE Business Premium frees you to focus your time and resources on more strategic projects that move your business forward.

Incompatible Software Removal ensures smooth deployment of VIPRE by automatically removing your old antivirus from all your machines to eliminate conflicts during installation.

Simple Management Console enables you to quickly and easily manage all your PCs and mobile devices, deploy agents, patch systems, manage settings and pull reports from a central location.

VIPRE Roaming Service helps you secure and centrally manage computers that leave the network or are located in remote offices via a cloud-based service using secure HTTPS protocols.

Unprotected Computer Identification alerts you to any machines accessing your network without antivirus protection, helping you stop infections before they spread to file servers and systems.

Strong Protection and Performance

VIPRE Business Premium proves that speed and security do go together. Don't settle for antivirus solutions that slow down your users' PCs and only generate calls and complaints to your desk.

VIPRE technology is optimized to quickly scan for threats without draining resources and killing the performance of your machines. VIPRE is so efficient that most users don't even notice it's running, even during scans.

Select the VIPRE That's Right for You

VIPRE Business Premium is our most robust endpoint security solution that combines antivirus, integrated patch management, Mobile Device Management (MDM) and more to centrally manage and defend PCs, Macs, iPhones, iPads and Android devices.

VIPRE Antivirus Business is the small-footprint antivirus software that enables IT administrators to centrally protect and manage PCs, Macs, iPhones, iPads and Android devices.

Value and Protection

VIPRE users rave about value, performance and protection.

"We are very satisfied with VIPRE and consider it to be the most reliable and cost-effective antivirus product we've used to date."

– Clifford Hanks, senior network engineer, Stillwater Medical Center

"...A solid product for a great price. We believed then and still do now, that VIPRE was the right choice..."

– Keith Slaughter, network coordinator, College Station ISD
